# PËRHAPJA E VIRUSIT

Rruga kryesore e përhapjes, bazuar në të dhënat e disponueshme aktualisht, janë rastet simptomatike.

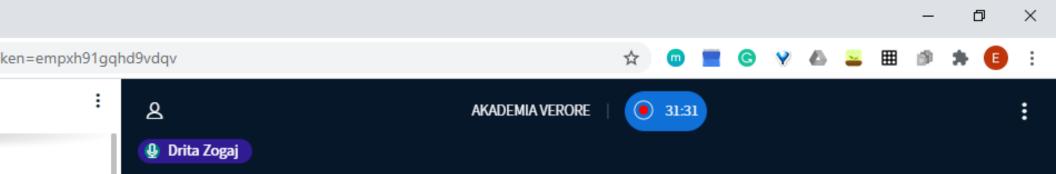

OBSH është në dijeni të përhapjes së mundshme të COVID-19 nga personat e infektuar para se të shfaqin simptoma.

Histori të detajuara të ekspozimit po merren për të kuptuar më mirë fazën para-klinike të infeksionit dhe se si përhapja mund të ketë ndodhur në këto pak raste.

Infeksioni asimptomatik mund të jetë i rrallë, dhe përhapja nga një person asimptomatik është shumë e rrallë me Coronaviruset e tjerë, siç kemi parë me MERS-CoV.
