

# ERASMUS MUNDUS JOINT MASTER IN PHYSICS

## APPLICATION OPPORTUNITY

Sapienza University is participating in a new **Erasmus Mundus Joint Master in Physics** that will offer about **20 fully-funded scholarships** (1400€/month for two years, funded by the European Community), to excellent students from all over the world.

The **QUARMEN** Master (QUAntum Research Master-level Education Network) is centered on **Quantum Science and Technology**. The master is taught in English by an international consortium of **4 universities**:

- University of Paris-Saclay (France)
- Sapienza University of Rome (Italy)
- University of Porto (Portugal)
- University of Toronto (Canada).

At the end of the two years, the students are awarded a **multiple diploma** according to the mobility track they chose.

It offers **many benefits** to the students: international mobility among up to four different countries and research institutions, possibility to prepare a master thesis in top level research centers, strong links with quantum technology companies and start-ups, and additional training in project management and entrepreneurial skills.

**Applications must be submitted online before April 3<sup>rd</sup>, 2022 on the website:**
